

# Ancient Greece

## Year 4

used used used  
 Helen was used when they go to battle nobody will kill them they would use even horses used for being safe.  
 they had protection a leg protection which nobody would chop there be leg they even went to battle's to protect them.  
 The formation used big great Hoplites marching into battle they would stand very close protecting themselves with shields and pushing their spears into the enemy's shields.

cap the shieldly soldier would have to go on shell if it was raining for badly.  
 they had big shields to kill the who were in battle.  
 they were a shield protect the soldiers head so they were would kill the soldiers with their spears.

protection  
 protection  
 protection

 people  
 people

the battles of Marathon  
 all skill come a wonderful day.

### VICTORY FOR US!

On Tuesday morning (490 BC), The Persian King King Darius planned to invade his city state because he wanted to rebuild his empire. So he was made it big and tall so he can make loads of things inside his navy to make it new and wonderful.

We were good to take action on the greedy and kind Persians. The strong Athenians, Philipides they were sent 560 km away to Sparta to get help up which Sparta gave them the best up to Philipides. never gave Sparta Philipides the best up they ran out of time they had been sent where else they can stay when they arrived Sparta never gave them the best up. The Persians never came there it was run out the trenches they have went from where there have to fight there self.

at Wednesday 11th September 2018  
 I'll describe daily life in Ancient Greece.  
 Family life  
 Ancient Greek family life was different to modern times. Ancient Greece was a patriarchal society. Men were the head of the household. Women were responsible for the home and children. Only rich families had servants because they could afford them. Most people lived by farming, fishing and trade. Others like slaves, soldiers, sailors, merchants and artists.

Fashion  
 A Greek woman wore a long tunic called chiton. Soldiers wore armor like for breast plate, helmet and shield. A helmet was made of leather or iron. Men wore short tunics.

Food  
 Ancient Greeks eat goat and bread for their breakfast. Cheese and bread were common. Olives were common in Ancient Greece because they were easy to grow in the hot climate. Other people like to eat grapes. Bread was made from wheat. They eat grapes, olives, cheese, bread, honey and wine. They also ate figs, pomegranates, and apples. They also ate eggs and bread spread with honey.

at October 2018  
 I'll describe the beliefs of the Ancient Greeks.

Zeus  
 was the brother of Poseidon and Athena. He was the god of the sky and lightning. He was the ruler of the gods. He was the most powerful god. He was the father of many gods. He was the god of the sky and lightning.

Athena  
 was the sister and wife of Zeus. She was the goddess of wisdom and war. She was the goddess of the city of Athens. She was the goddess of the city of Athens.

Artemis  
 was the sister and wife of Zeus. She was the goddess of the hunt and the moon. She was the goddess of the hunt and the moon.

Demeter  
 was the sister and wife of Zeus. She was the goddess of the harvest and the earth. She was the goddess of the harvest and the earth.

To introduce our topic, we had the pleasure of meeting Sir Teachalot, who taught us all about Ancient Greek life and warfare.

We also had a feast where we tried lots of different types of foods that the Ancient Greeks ate.

Did you know that in one of the Greek City-States, Sparta, all men were expected to join the army?

Boys had to leave their families behind to start training at 7 years old. Training to become a Spartan soldier took 23 years to complete!

To celebrate the end of our topic, we dressed up as Ancient Greeks and took part in lots of activities.

We formed a phalanx, which is a fighting formation, that the Greek soldiers used to make when going to war.

Pythagoras was an Ancient Greek Mathematician. We used our maths skills to solve problems based on his theory.

We designed and created a Greek computer game using software called 'Scratch'. We enjoyed developing our programming and coding skills.

We also had to work with our partners solving problems throughout the day.
