

Let's celebrate!

*Learning in year 1 during
the Spring Term....*

*People who Changed
the World*

Whatever Next

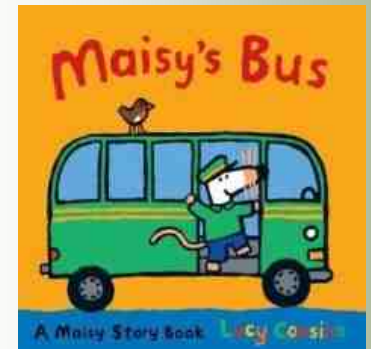

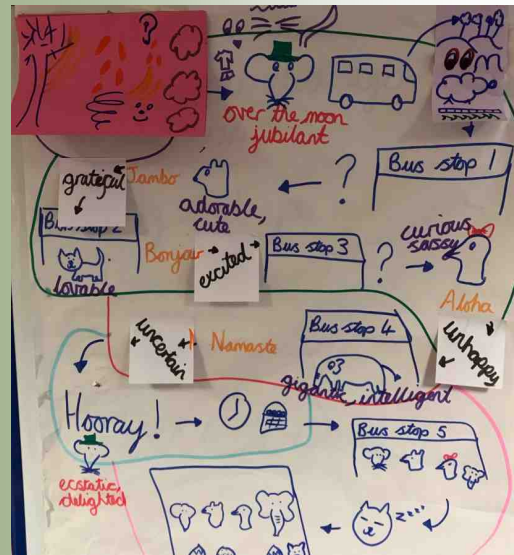

We have been learning all about a little bear who went on a great adventure to the moon. We started by sequencing the order Baby Bear gets ready for his voyage. We talked about how he felt and how this changed throughout the story. We had lots of fun meeting Mr Lewis' dog, Cooper. We decided to add him into our story. We decided that he would love to join Baby Bear on his adventure and used our imaginations to come up with fun activities them to do on the moon.

Monday 4th February 2019. HDZ Great work
I. To know we innovate part of a story. Baby bear took off up the chimney with a whoosh! Just then Cooper the cute sweet dog went with a jet ~~pos~~ ~~pace~~ pack. he liked baby bear's ~~horet~~ so he joined baby bear on his adventer to the moon.

World Maths Day...

This term we took part in World Maths day. We had great fun exploring Maths through the theme of India. We made symmetrical rangoli patterns, and tried to build the Taj Mahal with spaghetti and marshmallows. We worked out that triangles and squares were the most stable shapes to use in our structures. Finally, we also became artists, painting some fascinating symmetrical patterns!

One busy autumn morning the tall, towering trees were swaying in the wind. As the crispy, orange leaves fell they swirled to the ground. As the wind ruffled the leaves they blew upon your face. The white, cotton cloud rushed across the sky. Maisy was a mouse with a tiny ^{button} nose and round steady eyes. She had mice legs but she had a long, scaly tail. She wore small, green clothes.

Maisy's Bus

When we first read this book we decided it was far too easy for a Year 1 book, so we thought very hard and decided that we could re-write this book using all the learning we have done so far. We have added an interesting story opener and gave the characters and exciting adventure for the characters once they got off the bus.

We uplevelled the vocabulary to make it more engaging for the reader. We are really proud of our versions of this story.

Wow Day!

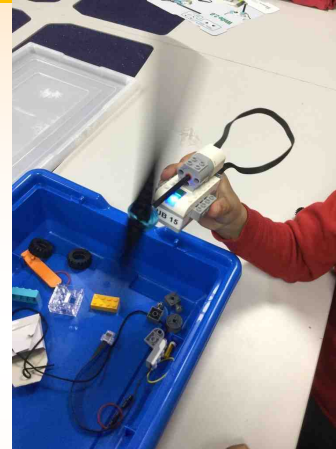

We started this topic by taking a trip to the moon. Our Year 1 building was transformed into the surface of the moon. We had such a great day learning all about Neil Armstrong and his expedition to the moon. We made Mo-droc moons, moon cakes, rockets and space themed snakes and ladders. What a great Day!

Young engineers...

This term we went the Young Engineers Academy twice! During our first visit, we use the Lego to make motorized helicopter propellers.

During our next visit, we made sailing boats.

People Who Changed the World.

We have been learning all about some famous people who have changed the world we live in. We have learnt how their inventions, experiences and adventures have impacted our lives.

We made airplanes like the Wright Brothers, sailed boats like Sir Francis Drake, pretended to be nurses like Florence Nightingale and thought about how Rosa Parks must have felt on the bus.
