

Year & Theme	Term 1	Term 2	Term 3	Guidance
<b>1</b>	<b>Key End of Year Objectives</b>			<b>Remember to refer to Parkfield Calculation Polices and Learning Ladders for full guidance.</b>
<b>Number &amp; Place Value</b>	<b>3 weeks</b>	<b>2 weeks</b>	<b>2 weeks</b>	Pupils should practise counting (1, 2, 3), ordering (e.g. first, second, third), or to indicate a quantity (e.g. 3 apples, 2 centimetres), including solving simple concrete problems, until they are fluent. They should practise counting as reciting numbers and counting as enumerating objects, and counting in ones, twos, fives and tens from different multiples to develop their recognition of patterns in the number system (e.g. odd and even numbers). They connect these patterns with objects and with shapes, including through varied and frequent practice of increasingly complex questions. Pupils begin to recognise place value in numbers beyond 20 by reading, writing, counting and comparing numbers up to 100, supported by concrete objects and pictorial representations.  Resources:
	To count to & across 100, forwards & backwards beginning with 0 or 1, or from any given number.  Given any number, identify one more and one less.  Identify and represent numbers using concrete objects and pictorial representations including the number line, and use the language of equal to, more than, less than (fewer), most, least.  To read and write numbers from 1 to 20 in digits and words.	To count to & across 100, forwards & backwards beginning with 0 or 1, or from any given number.  Given any number, identify one more and one less.  Identify and represent numbers using concrete objects and pictorial representations including the number line, and use the language of equal to, more than, less than (fewer), most, least. <b>Addition &amp; Subtraction</b>	<b>3 Weeks</b>	<b>2 Weeks</b>	<b>2 Weeks</b>	<p>Pupils should memorise and reason with number bonds to 10 and 20 in several forms (e.g. <math>9 + 7 = 16</math>; <math>16 - 7 = 9</math>; <math>7 = 16 - 9</math>). They should realise the effect of adding or subtracting zero. Pupils should combine and increase numbers, counting forwards and backwards.</p> <p>They should discuss and solve problems in familiar practical contexts, including using quantities. Problems should include the terms put together, add, altogether, total, take away, difference between, more than and less than so that pupils develop the concept of addition and subtraction and are enabled to use these operations flexibly.</p> <hr/> <p>Resources:</p>
	<p>To read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs.</p> <p>To represent and use number bonds and related subtraction facts to 20.</p> <p>To add and subtract one-digit and two-digit numbers to 20 (<math>9 + 9</math>, <math>18 - 9</math>), including zero.</p> <p>To solve simple one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems.</p>	<p>To read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs.</p> <p>To represent and use number bonds and related subtraction facts to 20.</p> <p>To add and subtract one-digit and two-digit numbers to 20 (<math>9 + 9</math>, <math>18 - 9</math>), including zero.</p> <p>To solve simple one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems.</p>	<p>To read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs.</p> <p>To represent and use number bonds and related subtraction facts to 20.</p> <p>To add and subtract one-digit and two-digit numbers to 20 (<math>9 + 9</math>, <math>18 - 9</math>), including zero.</p> <p>To solve simple one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems.</p>

2	<b>Key End of Year Objectives</b>			<b>Remember to refer to Parkfield Calculation Polices and Learning Ladders for full guidance.</b>
<b>Number and place value</b>	<b>3 Weeks</b>	<b>2 Weeks</b>	<b>2 Weeks</b>	Using materials & a range of representations, pupils should practise counting, reading, writing & comparing numbers to at least 100 & solving a variety of related problems to develop fluency. They should count in multiples of three to support later understanding of a third. As they become more confident with numbers up to 100. Pupils should be introduced to larger numbers to develop further their recognition of patterns within the number system & represent them in different ways, including spatial representations. Pupils should partition numbers in different ways (eg: $23 = 20 + 3$ and $23 = 10 + 13$ ) to support subtraction. They become fluent & apply their knowledge of numbers to reason with, discuss & solve problems that emphasise the value of each digit in two-digit in two-digit numbers. They begin to understand zero as a place holder.
	<p>To count in steps of 2, 3, and 5 from 0, and count in tens from any number, forward or backward .</p> <p>To recognise the place value of each digit in a two-digit number (tens, ones).</p> <p>To identify, represent and estimate numbers using different representations, including the number line.</p> <p>To compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs.</p> <p>To read and write numbers to at least 100 in numerals and in words.</p> <p>To use place value and number facts to solve problems.</p>	<p>To count in steps of 2, 3, and 5 from 0, and count in tens from any number, forward or backward .</p> <p>To recognise the place value of each digit in a two-digit number (tens, ones).</p> <p>To identify, represent and estimate numbers using different representations, including the number line.</p> <p>To compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs.</p> <p>To read and write numbers to at least 100 in numerals and in words.</p> <p>To use place value and number facts to solve problems.</p>	<p>To count in steps of 2, 3, and 5 from 0, and count in tens from any number, forward or backward .</p> <p>To recognise the place value of each digit in a two-digit number (tens, ones).</p> <p>To identify, represent and estimate numbers using different representations, including the number line.</p> <p>To compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs.</p> <p>To read and write numbers to at least 100 in numerals and in words.</p> <p>To use place value and number facts to solve problems.</p>

<b>2</b>	<b>Key End of Year Objectives</b>			<b>Remember to refer to Parkfield Calculation Polices and Learning Ladders for full guidance.</b>
<b>Multiplication &amp; Division</b>	<b>2 weeks</b>	<b>2 weeks</b>	<b>2 weeks</b>	<p>Pupils should use a variety of language to describe multiplication/division. They are taught multiplication &amp; division with larger numbers through equal grouping &amp; sharing out quantities, relating multiplication tables to arrays &amp; repeated addition &amp; finding more complex fractions of objects, numbers &amp; quantities. Pupils should be introduced to the multiplication tables. They should practise to become fluent in the 2, 5 &amp; 10 multiplication tables &amp; connect them to each other. They connect the 10 multiplication table to place value, &amp; the 5 multiplication table to the divisions on the clock face. They begin to use other multiplication tables &amp; recall multiplication facts, including using related division facts to perform and mental &amp; informal written calculations. Pupils should work with a <b>range of materials &amp; contexts</b> in which multiplication &amp; division relate to <b>grouping and sharing</b> discrete &amp; continuous quantities, relating these to fractions &amp; measures (e.g. <math>40 \div 2 = 20</math>, 20 is a half of 40). They use commutativity and inverse relations</p>
	<p>To recall and use multiplication &amp; division facts for the 2, 5 &amp; 10 multiplication tables, inc. recognising odd &amp; even numbers.</p> <p>To double/halve any single digit number &amp; begin to use partitioning to double/halve 2-digits.</p> <p>To calculate mathematical statements for multiplication &amp; division within the multiplication tables &amp; write them using the multiplication (<math>\times</math>), division (<math>\div</math>) and equals (=) signs.</p> <p>To recognise and use the inverse relationship between multiplication &amp; division in calculations.</p> <p>To show that multiplication of two numbers can be done in any order (commutative) &amp; division of one number by another cannot.</p> <p>To solve one-step problems involving multiplication &amp; division, using materials, arrays, repeated addition, mental methods, &amp; multiplication &amp; division facts, including problems <b>in contexts</b>.</p>	<p>To recall and use multiplication &amp; division facts for the 2, 5 &amp; 10 multiplication tables, inc. recognising odd &amp; even numbers.</p> <p>To double/halve any single digit number &amp; begin to use partitioning to double/halve 2-digits.</p> <p>To calculate mathematical statements for multiplication &amp; division within the multiplication tables &amp; write them using the multiplication (<math>\times</math>), division (<math>\div</math>) and equals (=) signs.</p> <p>To recognise and use the inverse relationship between multiplication &amp; division in calculations.</p> <p>To show that multiplication of two numbers can be done in any order (commutative) &amp; division of one number by another cannot.</p> <p>To solve one-step problems involving multiplication &amp; division, using materials, arrays, repeated addition, mental methods, &amp; multiplication &amp; division facts, including problems <b>in contexts</b>.</p>	<p>To recall and use multiplication &amp; division facts for the 2, 5 &amp; 10 multiplication tables, inc. recognising odd &amp; even numbers.</p> <p>To double/halve any single digit number &amp; begin to use partitioning to double/halve 2-digits.</p> <p>To create partial tables for single digit numbers.</p> <p>To calculate mathematical statements for multiplication &amp; division within the multiplication tables &amp; write them using the multiplication (<math>\times</math>), division (<math>\div</math>) and equals (=) signs.</p> <p>To recognise and use the inverse relationship between multiplication &amp; division in calculations.</p> <p>To show that multiplication of two numbers can be done in any order (commutative) &amp; division of one number by another cannot.</p> <p>To solve one-step problems involving multiplication &amp; division, using</p>	

			materials, arrays, repeated addition, mental (& informal written), methods & multiplication & division facts, including problems <u>in contexts</u> .	to develop multiplicative reasoning (e.g. $4 \times 5 = 20$ and $20 \div 5 = 4$ ). <hr/> Resources:

<b>Addition and Subtraction</b>	<b>2 weeks</b>	<b>2 weeks</b>	<b>2 weeks</b>	Follow progression detailed in calculation policy and models & images described. Pupils should only be introduced to columnar addition once secure with quantitative & column aspects of place value – strong AfL evidence of this must be gathered prior to introduction to this strategy (see 'Am I ready for written methods' guidance). When introducing to column method, use base ten apparatus first and continue to use this as they progress through each stage (see policy for guidance). As column method is introduced strong emphasis must be placed on choosing when to use this method. When is this the most effective method? And mental/ad hoc methods should still be encouraged when numbers suggest they would be more efficient. Eg: 207 – 9 would be done mentally (using number line approach).  Resources: Base ten apparatus Arrow cards
	To add & subtract numbers with up to 4 digits using efficient methods (this should lead to columnar addition then subtraction <b><u>where appropriate(see guidance)</u></b> ).  To estimate & use inverse operations to check answers to a calculation. To solve addition & subtraction two-step problems in contexts, deciding which operations & methods to use & why. <b>4</b>	<b>Key End of Year Objectives</b> <b>Models &amp; images continue to be essential learning tools throughout KS2.</b>			<b>Remember to refer to Parkfield Calculation Polices and Learning Ladders for full guidance.</b>
<b>Decimals and Fractions</b>	<b>2 weeks</b>	<b>1 week</b>	<b>1 week</b>	Pupils should be taught throughout that decimals and fractions are different ways of expressing numbers. Pupils' understanding of the number system and decimal place value is extended at this stage to tenths and then hundredths. This includes relating the decimal notation to division of whole numbers by 10 and later 100. Pupils should learn decimal notation and the language associated with it, including in the context of measurements. They make comparisons and order decimal amounts and quantities that are expressed to the same number of decimal places. They should be able to represent numbers with one or two decimal places in multiple ways, such as on number lines.
	<p>To recognise and write decimal equivalents of any number of tenths or hundredths.</p> <p>To recognise &amp; write decimal equivalents to <math>1/4</math>; <math>1/2</math>; <math>3/4</math></p> <p>To find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths.</p> <p>To round decimals with one decimal place to the nearest whole number.</p> <p>To compare numbers with the same number of decimal places up to two decimal places.</p> <p>To solve simple measure and money problems involving fractions and decimals to two decimal places.</p>	<p>To recognise and write decimal equivalents of any number of tenths or hundredths.</p> <p>To recognise &amp; write decimal equivalents to <math>1/4</math>; <math>1/2</math>; <math>3/4</math></p> <p>To find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths.</p> <p>To round decimals with one decimal place to the nearest whole number.</p> <p>To compare numbers with the same number of decimal places up to two decimal places.</p>	<p>To recognise and write decimal equivalents of any number of tenths or hundredths.</p> <p>To recognise &amp; write decimal equivalents to <math>1/4</math>; <math>1/2</math>; <math>3/4</math></p> <p>To find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths.</p> <p>To round decimals with one decimal place to the nearest whole number.</p> <p>To compare numbers with the same number of decimal places up to two decimal places.</p>

	Highlight objectives as taught & use this space to record areas that are insecure.			

				<p>Pupils should practise, use &amp; understand the addition &amp; subtraction of fractions with different denominators by identifying equivalent fractions with the same denominator. They should start with fractions where the denominator of one fraction is a multiple of the other (e.g. <math>1/2 + 1/8 = 5/8</math>) and progress to varied and increasingly complex problems.</p> <p>Pupils should use a variety of images to support their understanding of multiplication with fractions. This follows earlier work about fractions as operators, as numbers, and as equal parts of objects, for example as parts of a rectangle.</p> <p>Resources:</p>
